

# The Mold Journal

You've got a mold problem.. What's next? Of course, you call us for help! But you may be confused how everything is supposed to work..

Here's a *summary* of our services..

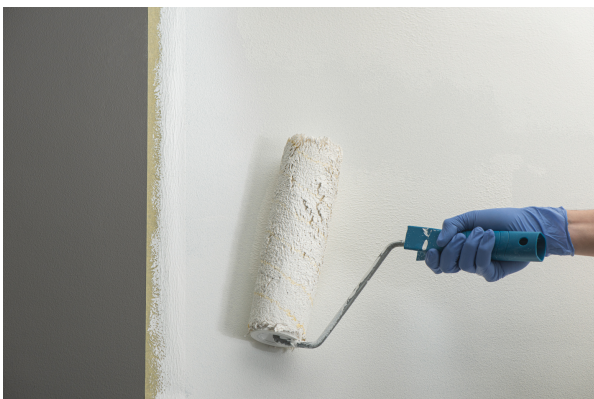

To complete the process of mold remediation, we have to ensure the work done is safe and *not have the spores run amok*.

To do so, we utilize multiple equipments to make sure everything goes smoothly..

**Protection** → **Control** → **Decontamination**

After *protection of all your furnitures & floors*, we proceed to *electrostatic fogging* of your affected walls & ceilings. This step *does not remove mold stains*, however, the *molds are killed and are not able to spread*.

## **Mold Proof Repainting**

Once the molds are killed, we begin our repainting process where we apply mold proof paints to *prevent future mold growth*.

# The Mold Journal (FAQ)

## What about my clothes? Do we clean them too?

We do not provide services to clear molds from your clothes, accessories, etc. We have a step-by-step guide on how to DIY remove molds from your clothes on our [website](#)! However, to ensure that all molds are effectively cleared, it is advised to seek laundry specialists for instructions.

## What about my cabinets?

If these surfaces are affected by mold growth, we are able to clear the molds as well however no painting will be done for laminate surfaces. We will electrostatically fog the anti-microbials onto the affected surfaces and give a wipedown.

## Is the process safe? Can we stay in during the works?

The anti-microbials we use are eco-friendly and non-toxic. The paint we use has a very low odour. It is possible to stay in during the works, however the process may be uncomfortable due to sounds and slight smells.

## How long will the works take?

Generally, an entire room can be completed within 4-5 hours. Depending on the situation of your homes, the process can extend to a couple of days if necessary.
